**DETAILED ACTION**

**EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

**IN THE CLAIMS:**

Claims 1-34, 41-47, and 51-59 have been deleted.

Authorization for this examiner's amendment was given in a telephone interview with Thomas Spinelli on June 23, 2005.

The application has been amended as follows:

**IN THE CLAIMS:**

In claim 40, line 10, "and said operation related to recovery operations." has been changed to -- and said operation related to recovery operations performed in accordance with a selection by a user. --.

*Allowable Subject Matter*

2. Claims 35- 40, 48-50, and 60-63 are allowed.
3. The following is an examiner's statement of reasons for allowance:

U. S. Publication No.2002/0032470 to Linberg is the reference closest to the claimed

invention. Linberg discloses a maintenance method for performing maintenance with a medical control apparatus, connectable to medical devices used for medical purposes such that said medical control apparatus controls said medical devices, said method comprising: a specifying step for specifying a trouble item; a processing step for performing estimation processing for recovery operations or an operation method for recovering from trouble of an item specified in said specifying step; and a display step for displaying information of recovery operations or a recovery operation method. However, Linberg does not teach performing estimation processing for at least one of recovery operations and an operation related to recovery operations and displaying information of at least one of said recovery operations and said operation related to recovery operations performed in accordance with a selection by a user; and including all of the other limitations in the respective independent claims.

U. S. Publication No.2002/0032470 to Linberg is the reference closest to the claimed invention. Linberg discloses a maintenance method for a medical control apparatus which outputs control information for controlling medical devices to said medical devices used for medical purposes via a communication interface, and receives information of the state of actions from said medical devices via an interface, said method comprising: a maintenance instructing step for instructing maintenance; and a specifying step for specifying at least one trouble item of said plurality of trouble items displayed in said trouble item display step. However, Linberg does not teach a trouble item display step for displaying on a predetermined display device a plurality of trouble items relating to the set-up of said medical device, according to said maintenance instructing step and a display step for displaying countermeasures information for recovering

from the trouble item specified in said specifying step; and including all of the other limitations in the respective independent claims.

U. S. Publication No.2002/0032470 to Linberg is the reference closest to the claimed invention. Linberg discloses a recording medium storing a program for a maintenance method for a medical control apparatus which outputs control information for controlling said medical devices to the medical devices used for medical purposes via a communication interface, and installs information of the state of actions received from said medical devices via a communication interface in said medical control apparatus, comprising: code for a maintenance instructing step for instructing maintenance; code for a trouble item display step for displaying trouble items relating to said medical devices, according to said maintenance instructing step; code for a specifying step for specifying at least one trouble item of said trouble items displayed in said trouble item display step; code for an estimating step for estimating causes causing said trouble item specified in said specifying step. However, Linberg does not teach code for a priority display step for displaying, with higher priority, countermeasures information estimated in said estimating step to have higher probability of being the cause of said trouble item, as compared with countermeasures information with lower probabilities; and including all of the other limitations in the respective independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
